FOREWORD

The Center for Advanced Studies in Management and Economics (CEFAGE) is a Portuguese research unit created in 2006 by a group of researchers from the Universidade de Évora. Still hosted by this university, CEFAGE has currently also branches located at three other institutions: Universidade da Beira Interior, Universidade do Algarve and Universidade Nova de Lisboa (Faculty of Science and Technology).

The main priority of CEFAGE is to promote high-quality research in Economics and Management. In 2014, in its second evaluation by the Portuguese Foundation for Science and Technology (FCT), CEFAGE achieved the grade: *Very Good*.

Since 2011, CEFAGE is also in charge of the Doctoral Program in Economics of the consortium Universidade de Évora / Universidade da Beira Interior and the Doctoral Program in Management of the Universidade de Évora.

Currently, the research unit of CEFAGE has 48 integrated members. This report describes the research activities of these 48 researchers between 2013 and 2017 (period currently being evaluated by FCT).

1. OVERVIEW

1.1. Aims and Policy

The main priority of CEFAGE is to promote the production and diffusion of high-quality research in Economics and Management. To achieve this goal, it is CEFAGE's policy:

- To offer its members means to produce research publishable in well-regarded scientific international journals, supporting the presentation of their on-going work in scientific meetings and the acquisition of books, software packages and databases;
- To maintain a ranking of Economics and Management journals, which is used to reward researchers with high-quality publications;
- To promote cooperation with researchers from other institutions, through the participation of its members in national and international scientific networks, the participation in joint research projects and co-authorship of scientific articles;
- To keep a very stimulating research environment and promote a close cooperation between its members, encouraging the publication of their preliminary work in CEFAGE's Working Paper Series and organizing an internal workshop series in order to facilitate the communication and sharing of ideas among them;
- To organize relevant international conferences in the areas of Economics and Management, so as to increase the international visibility of CEFAGE as a research group;
- To organize Summer Schools, specialized short workshops and technical seminars in order to keep its members and PhD students up to date with respect to the most recent advances in the fields of Economics and Management and well prepared to use the databases and the software packages available at CEFAGE;
- To involve its PhD students on CEFAGE regular research activities, who will have the opportunity to participate in research projects and conferences, to present their work at the annual CEFAGE Doctoral Consortium and to publish their preliminary work in CEFAGE's Working Paper Series.

In addition, CEFAGE also supports the consulting activities of its members.

1.2. Research Interests

The research interests of CEFAGE's members in the period between 2013 and 2017 covered, among other fields, agricultural economics, econometrics, environmental resources, finance, industrial organization, innovation and entrepreneurship, international economics, labour economics, marketing and consumer behaviour, spatial economics and sustainable growth. Therefore, CEFAGE's research activities were structured in four research groups:

- Econometrics, Statistics and Operations Research
- Finance
- Industrial Economics and Business Strategy
- Labour, Regional and Macroeconomics

Furthermore, considering our members' research interests, their skills and competencies, in the period 2013-2017 CEFAGE's research was also organized along the following major eleven thematic strands:

1. Econometrics of Discrete and Limited Outcomes
2. Strategy, Operations and Performance
3. Environmental and Agrifood Economics and Management - Theoretical and Empirical Approaches
4. Capital Structure, Investment Decisions and Firm Performance
5. Asset Markets and Investor Behavior
6. Regulation and Competition Policy
7. Entrepreneurship, Innovation and Industry Dynamics
8. Labor Market and Development
9. Economic Growth and Development: Theory, Policy and Empirics
10. Theoretical and Empirical Advances in Tourism Economics
11. International Monetary Economics and Integration

1.3. Journal Ranking

The main aim of the CEFAGE Journal Ranking is to promote the production and publication of high-quality research in the areas of Economics and Management. To this end, the ranking has a pyramidal structure and covers only a selective set of journals. Journals are divided into 4 categories (A,B,C,D), with category A being further divided into AAA, AA and A so as to clearly distinguish the top journals in Economics and Management. The ranking was defined considering other well-known journal rankings (i.e. ABS, ABDC, CNRS).

Rate	Definition
AAA	Top general Economics or Management journal
AA	Top field journal or excellent general Economics or Management journal
A	Excellent field journal or very good general Economics or Management journal
B	Very good international peer-review journal
C	Good international peer-review journal
D	Other well-known international peer-review journal

The fourth edition of the CEFAGE journal ranking is available at the following address:
